Summary

A Morphological Processing	1
A.1 Problem statement	1
A.2 Python implementation	1
A.3 Erosion	2
A.4 Dilation	2
A.5 Opening	3
A.6 Closing	3
A.7 Boundary extraction	4
A.8 Hole filling	4
A.9 Connected component extraction	5

A. Morphological Processing

A.1 Problem statement

- (a) Implement the morphological operations : erosion, dilation, opening and closing, and use the `noisy_fingerprint.tif` to check your implementation.
- (b) Implement boundary extraction, hole filling, connected component extraction. Using `licoln_from_penny.tif`, `region_filling_reflection.tif` and `chickenfilet_with_bones.tif` to the results, respectively.

A.2 Python implementation

Usage : `problem8.py [-h] [-debug] [-test] [-erosion] [-dilation]`
`[-opening] [-closing] [-boundary] [-filling]`
`[-connected]`
`image_path`

Use `python problem8.py -h` to see the help.

A.3 Erosion

```
python problem8.py -erosion noisy_fingerprint.tif
```

FIGURE A.1 – Original image

FIGURE A.2 – Erosion

A.4 Dilation

```
python problem8.py -dilation noisy_fingerprint.tif
```

FIGURE A.3 – Original image

FIGURE A.4 – Dilation

A.5 Opening

```
python problem8.py -opening noisy_fingerprint.tif
```

FIGURE A.5 – Original image

FIGURE A.6 – Opening

A.6 Closing

```
python problem8.py -closing noisy_fingerprint.tif
```

FIGURE A.7 – Original image

FIGURE A.8 – Closing

A.7 Boundary extraction

```
python problem8.py -boundary licoln_from_penny.tif
```

FIGURE A.9 – Original image

FIGURE A.10 – Boundary extraction

A.8 Hole filling

```
python problem8.py -filling region_filling_reflections.tif
```

FIGURE A.11 – Original image

FIGURE A.12 – Hole filling

A.9 Connected component extraction

```
python problem8.py -connected chickenfilet_with_bones.tif
```
